## Summary

Java Backend Developer with hands-on experience building 4 full-stack applications using Spring Boot, RESTful APIs, and React.js. Proficient in Java, MongoDB, SQL, and JWT-based authentication. Strong understanding of object-oriented programming (OOP), data structures, and algorithms, with over 700 problems solved on LeetCode. Experienced in version control (Git), API testing (Postman), and building high-performance REST APIs.

## Education

**Malla Reddy College of Engineering and Technology**

**2022 – 2026**

*B.Tech in Computer Science and Engineering (IoT)*

*CGPA: 9.21*

## Projects

**Class Archive** | *Spring Boot, React.js, Node.js, MongoDB*

**2024**

- Developed a full-stack educational resource management system enabling students to access and download lecture notes with role-based permissions
- Implemented secure file upload/download functionality with Spring Security and JWT authentication for admin-controlled content distribution
- Designed responsive React.js frontend with MongoDB integration for real-time document management and preview capabilities

**Wallet Payment System** | *Spring Boot, React.js, Node.js, MongoDB*

**2024**

- Engineered a scalable payment processing platform supporting multiple independent merchant environments with custom user management
- Implemented secure transaction processing using Spring Security with JWT tokens and role-based access control
- Developed React.js dashboard for merchants to manage users, transactions, and financial reports with MongoDB data visualization

**College Gatepass System** | *Spring Boot, MongoDB*

**2023**

- Digitalized college gatepass management system handling daily requests with department head approval workflows
- Developed robust backend architecture using Spring Boot and MongoDB to ensure secure and efficient request processing
- Implemented role-based access control for department heads to review and approve/deny student gatepass requests
- Reduced gatepass processing time by 75% compared to manual paper-based system

## Freelance & Independent Projects

**Clinic Management System** | *Spring Boot, React.js, MongoDB*

**2024**

- Delivered a high-traffic clinic management solution supporting 100+ daily appointments with secure online scheduling
- Implemented admin portal with Spring Security for managing physician schedules, patient records, and payment processing
- Integrated PCI-compliant payment gateway handling 500+ monthly transactions with encrypted data storage
- Optimized system performance to handle 50+ concurrent users during peak hours with 99.9% uptime

## Technical Skills

**Languages:** Java, Python, JavaScript

**Frameworks & Tools:** Spring Boot, Spring Security, React.js, Node.js, REST APIs

**Testing & Build:** JUnit, Postman, Maven

**Databases:** MongoDB, SQL, NoSQL

**Cloud Services:** AWS

**Concepts:** OOP, Data Structures & Algorithms

## Certifications

**Java Programming**

**Completed**

**Web Development**

**Completed**

**Data Structures & Algorithms - Problem Solving Track**

**LeetCode**
